ALWAYS LEARNING

Computer Based Testing –
The use of Information Technology in the assessment of a persons cognitive or practical abilities

Advantages:
- Different types of assessment
- Accessibility
- Security
- Data
- In line with learning and the way we work

Computer Generated Simulations

Other Item Types:
•MCQ
•Essay
•Short Answer
•Drag & Drop
•Hot Spot
•Sequencing

PEARSON

Real life application:
Diagnose and treat

"Combination of
Assessment
types
to test applied
knowledge
not just recall
ability"

PEARSON

'Serious Gaming'
- Immersed in real life scenarios
- Formative Assessment

Blood Tests

Radiology

EKG

PEARSON

Easily distributed to more test centres:
- **More accessible to your candidates**
- **Lessens logistical burden**
- **Increased volumes**

PEARSON

Test Security
- No lost or stolen papers
- Data forensics
- Enhanced biometric capabilities
- Item and distracter randomisation

PEARSON

Enhanced Data Capture
- Psychometric analysis
- Data forensics
- Candidate feedback

Fair, Valid and Reliable Test = Defensible Test
