

Salvatore Ramuscello, M.D.
Candidate for Vice President

Director, General Surgery Unit, Chioggia-Venice Hospital, Veneto, Italy

Former Vice Chairman of the Medical College of the Province of Venice

Tutor for medical students at the University of Padova

As is known to all of you I held the position of vice president of UEMS in the previous mandate. It has been four years of hard work for the entire EEC. During these last four years the UEMS has transformed from a small to a large association with substantial changes in the areas of responsibility of the state economic and taxation.

We purchased the building where it was built Domus Medica although this project is not yet finished as the other European Medical Associations have not yet fully shared this project.

In my view, the Vice Presidents should be given a greater role in our organization. And 'I intend to work for the Vice-Presidents can be an integral part of the executive.

They should be given the task of following directly the four areas in which to divide our organization:

- Area of Surgery
- Area of Medicine
- Area of Medical Service
- Area of Forensic Medicine

I believe that development of the interest of forensic medicine of UEMS is required. As an association of medical specialists we must not forget that the principle of the free movement of professionals across Europe, can not disregard the principle of the protection both in civil and in penal matters.

The safety of care for patients need for greater serenity of specialists during his work

If I am elected, I will work for this.

Thank you
