Meeting of the working group on E-Health

Marrakesh, April 27th 2018

The digitalization of healthcare:

- Is already happening and will continue
- It will change the practice of doctors
- The medical profession needs to respond to this challenge in a creative and open-minded way

Many issues linked to this topic:

- Data protection
- Confidentiality
- Insurance
- Artificial intelligence (AI)
- Decision-taking and accountability
- Specialized medical practice

Focus on UEMS core competences:

- Impact of digitalization of healthcare on the ETR of medical specialties
- Impact of digitalization of healthcare on the recommended CME activities for medical specialists

Action points:

- Rename: working group on the Digitalization of Medical Care
- Involve trainee doctors
- Have exchanges of views with other stake holders, including commercial players, in that field
- Prepare a more action plan for October 2018
