25 August, 2015

Dear Professor Borman,  
Dear Secretary General,

On behalf of the Section of Clinical Genetics (SCG) of the UEMS, hereby I contact you with the request to change our current name to Section of Clinical Genetics and Genomics (SCGG). In the last section meeting held in Glasgow this June, the attended national representatives already accepted this amendment by voting on it. The short rationale of this action comes from the rapid changes of our profession; the contemporary clinical genetics strongly rely on the new genomic technologies and interpretation of them. Please put into the agenda of Warsaw meeting this aim to enable us to present the objectives to the National Representatives and to the representatives of the sections.

Yours sincerely,

Béla Melegh  
president of SCG
