How can I contribute to UEMS

- **Continuing Medical Education, and Post graduate Medical training** are areas where I have specific Competence.
- With my **broad view of national and European Politics** I could help develop the specific **relationship** between UEMS council the UEMS sections and boards, Specialist Societies and European Junior doctors.
- **Domus Medica.** I believe that with my experience with NMAs I could help make the dream of a common roof where the main European organisations can work together come true.
