

EUROPEAN UNION OF **MEDICAL SPECIALISTS**

The advocate of medical specialists

UEMS Members

FULL MEMBER

ASSOCIATE

OBSERVER

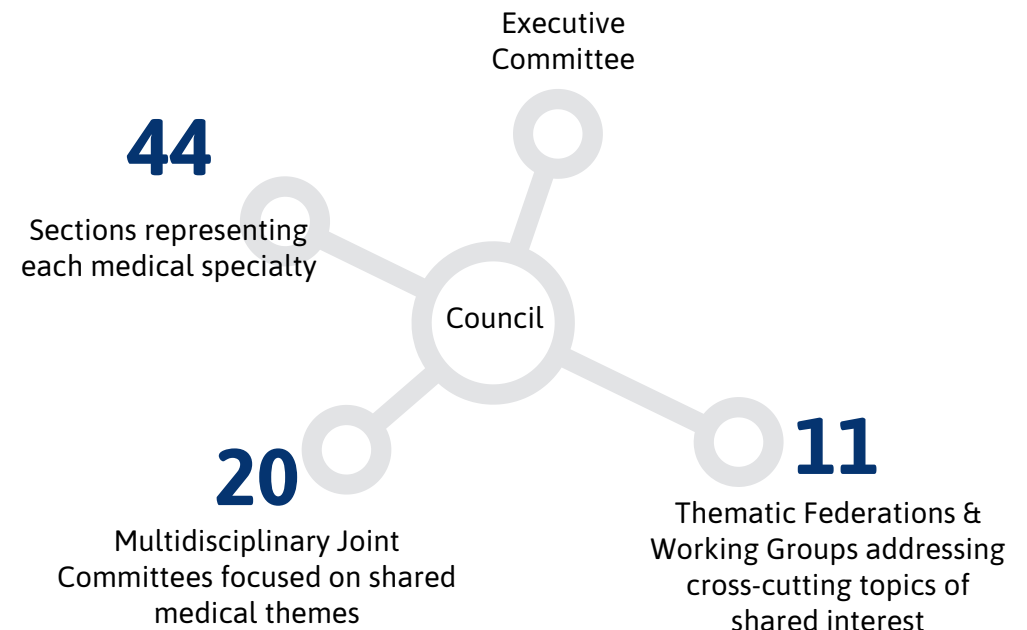

UEMS members are the most representative associations of medical specialists in their respective countries.

Our most precious resource is the people who dedicate time and passion in the projects endeavoured by the UEMS.

Our structure

The UEMS has a **broad and inclusive structure** that brings together medical specialists from across Europe and beyond. This framework allows specialists **to collaborate, share expertise, and develop common positions** within their disciplines and for the medical profession.

UEMS activities are overseen by its Executive Committee and internal bodies, and supported by a dedicated, experienced team working from the Domus Medica Europaea – the UEMS House, in the heart of Brussels' European quarter.

Our objective

Improving patient care throughout Europe and beyond by developing and supporting excellence in specialist medical practice.

”

UEMS is real projects for real people in real life.

UEMS Key pillars

Through its activities and projects, UEMS provides tangible support to medical specialists with the shared aim of improving patient care.

Our mission to strengthen medical training and professional practice is organised around three complementary pillars:

Post-Graduate Training

Supporting medical specialists to strengthen their training and enhance their professional competence.

Continuing Medical Education

Setting quality standards and accrediting Continuing Medical Education events and resources for health professionals.

Advocacy for medical specialists

Representing and defending the interest of medical specialists in their training and professional practice.

Post-Graduate Training

We develop **European Training Requirements** in **over 70 medical specialties or disciplines**, setting out the knowledge, skills, and attitudes that a specialist must acquire during their training in order to practice independently and safely.

We organise **European examinations** in **more than 40 medical fields**, to assure high-level standards of the training of medical specialists.

We **assess and accredit training centres** to ensure high standards training with optimal environment for trainees and trainers.

Continuing Medical Education

The **UEMS – EACCME®** — European Accreditation Council for Continuing Medical Education — **accredits more than 3,000 medical education** activities across Europe. Our rigorous accreditation process and criteria are designed to promote excellence in CME and CPD,

ensuring the highest quality and most up-to-date patient care.

Moreover, the UEMS – EACCME® supports the international recognition of CME credits, enabling their acceptance not only across Europe but also in the USA, Canada, Latin America, and the Caribbean.

Advocacy

UEMS engages in dialogue with EU institutions and health stakeholders to ensure that the voice of medical specialists is heard in policy making.

We take part in European projects to improve medical practice and the working conditions and professional environment of doctors.

About us

The UEMS is a European non-profit organisation representing more than 1.7 million specialist doctors, from EU countries and beyond.

Medical specialists, healthcare professionals, and stakeholders, be part of the UEMS community and contribute to the advancement of medical excellence in Europe. Together, we can shape the future of healthcare and improve patient outcomes across the continent.
